Architecture The building and civil engineering CAD market began in 1977 with architectural CAD software, including architecture, engineering, and construction. Autodesk and Autodesk Architectural Desktop continue to be popular among architects and their clients and building information modeling and AEC software. Since the inception of Autodesk's architectural product line, Autodesk has produced seven different software products in the market. There are software products for drafting, schematic, design and visualization and for BIM. In architectural applications, Autodesk products include: Architectural products AutoCAD Architecture AutoCAD LT Architecture AutoCAD Mechanical Architecture AutoCAD Electrical Architecture AutoCAD Civil Architecture AutoCAD Construction Architecture Design Web Enterprise Cloud Architecture Autodesk Industrial Design Factory Architectural applications AutoCAD Mechanical AutoCAD Electrical AutoCAD Civil 3D AutoCAD Electrical + Advanced Applications There are other products, including AutoCAD Forge, and Forge Blocks, which are part of AutoCAD LT. AEC software The AEC software market in Autodesk includes: AirWorks Builds on BIM foundation and uses data exchange Construction Cloud Enterprise Autodesk AEC Architecture Fusion Architecture Suite Fusion Architecture Suite (FAS) combines the flexibility of FEM and the tools for analysis of structural components available in Autodesk Architecture. This integration enables easy and effective product development and creation of 3D structural models. Forge AEC In February 2010, Autodesk released AutoCAD LT on a subscription basis. Since then, it has been integrated with AutoCAD LT Architecture and then AutoCAD LT Mechanical, which allowed users to combine the capabilities of both into one product. Also in February 2010, Autodesk announced Fusion Architecture Suite, a new suite of products that combines the engineering simulation and visualization features of AutoCAD LT Architecture with the analysis capabilities of AutoCAD Mechanical and AutoCAD Civil 3D. In August 2015, Autodesk updated its AEC product line, splitting its products into two distinct groups: AEC and Architectural software Fusion Architecture Suite Fusion Architecture Suite (FAS) combines the flexibility of FEM and the tools for analysis of structural components available in Autodesk Architecture. This integration enables easy and effective product development and creation of 3D structural models. Enterprise 5b5f913d15
