Rafflecopter Wednesday, 3 August 2017 It's been a long time since we heard news about the next major release of Spotify. The streaming music service is taking its time to overhaul its desktop interface, and the next version is already in the alpha stage not exactly a surprise, given that the public beta is in the middle of this year. But the company is also hard at work on a new application designed to take a stab at the functionality long lacking in the app. Spotify is in the process of bringing the redesign forward with a new app that serves up Spotify's features as they exist today. To make the transition smooth, the app will use some of Spotify's own UI (user interface) such as the Browse tab and account sidebar as well as use the same playlist and artist library that you have in Spotify's website. Spotify version 1.2.0 launches as an app for the Mac today in the beginning, you'll get access to the web version of Spotify, but you'll also have the ability to switch over to the app in the future. There aren't many changes in the 1.2.0 beta (the web version has been updated to the 1.2.0 beta), but there are some new features. Spotify 1.2.0 adds a new tab that features all the music you have in the account songs, albums, playlists, and other music files. Spotify's new Play queue feature lets you add multiple songs to a playlist from the browser without having to jump to the app. You can also download playlists directly to your Mac assuming you have purchased them through the web version of Spotify. This is something you can't do in the mobile app. Spotify is also introducing more social features you can share any tracks or albums you like on your Facebook wall. You'll also get access to Facebook's new buy button, so you can easily buy songs or albums from the social network. Spotify is also building its app toward a mobile-first world

Å .A man who has never met his biological mother and was adopted at birth has been named the world's youngest adult. Sonny Storm, who was born with a rare genetic condition, leukoencephalopathy, only reached the age of 30 after she died in 1974, according to reports. The 37-year-old said he was teased at school and faced bullying for his condition. He said: 'People just thought I was weird. I was born with a leg amputated and they used to run around calling me Bambi. The school days were hard. I don't know why I got called these names. I was born without a leg, but I can't show that side of myself.' Storm said he was once kicked to the ground for holding up a glass during a birthday party, and people would laugh and mock him. Despite the negativity, Storm said he still values every memory he has with his mother. His mother, a single mother of three, died of a respiratory disease when Sonny was just three weeks old. Storm, who now lives with his adoptive mother in Kansas, said he looks up to her as if she is his biological mother, reports the Sun. He said: 'I love my adoptive mother. She has always been there for me. She has taken me to the doctor and she is always there for me. She has been like a mother to me.' One of Sonny's doctors said people in his position should not have to look back on their past. He said: 'Sonny has adjusted well as a 30-year-old adult. He has a very positive attitude and is very thankful to have had the past 30 years, even though he was not able to experience being a child.' Storm said he is thankful for his life and the love his adoptive mother has given him. He said: 'I am happy I had a mom, and I am happy I have an adoptive mom. I love them both and I know they would love to meet me. ♦ 3e33713323
