Sleep Moon Xpress (Latest)

Sleep Moon Xpress Cracked Accounts is an application that allows you to schedule commands, as well as to temporarily control your computer's hardware components like keyboard, mouse, lights and even the fans. It contains many features The software includes a large number of features, allowing you to perform or schedule a large variety of tasks, such as:

- Sleep Moonlight - Use the application to automatically shut down your computer or notify you whenever your download or upload is not fast enough, which can be adjusted with detailed settings.
- Power Off - You can schedule multiple commands and interruptions for your PC to automatically shut down, or trigger different actions like restarting it, or waking up with a sound or an alarm.
- Log Off - You can schedule a shutdown or log off. Use sleep moon to be notified whenever a potential danger occurs, as the software enables you to shutdown your computer at night or on Saturday.
- Alarm clock - Sleep moon enables you to shut down, log off or to notify you of a potential danger like a potential threat on your network or virus infections.
- Email check - Set a password for your PC, and as soon as you put it into your mailbox, the application will automatically send you an email to warn you that it is late, forcing you to save your work.
- Notification - You can schedule a notification window to instantly pop up in the middle of the night or a day with a sound and a special message.
- Lock screen / no sleep - You can turn on a black screen when you are asleep.
- WiFi Access Point - You can control the power of your router by setting up a lock screen / no sleep when you go to bed.
- Password Generator - When Sleep moon detects a device on the network, it will ask you for a password to change your router's settings.
- Wifi Alert - Automatically disconnect from a network with more than one access point.
- Wifi Wapper - Wifi Wapper is a useful tool that detects the wireless network you're connected to. If you don't need it anymore, just click the icon to disconnect. Sleep moon helps you with this task.
- Automatically unplug - Power Management is very important. If you are working on a battery powered computer, you might need to disconnect it from a power supply.
- Fan speed - You can quickly change the speed of your fans.
- Battery status - Sleep moon can automatically change the fan speed based on your device's battery status.

Sleep Moon Xpress Crack+ With Serial Key

Scheduling the computer to perform different tasks is necessary and useful in many situations. Sleep Moon Xpress is an application that can help you set automatic commands for your PC, such as logging off, shutting down or restarting. Can perform a large variety of tasks The software offers you a simple interface, so even the inexperienced user can easily access its features. Yet, it comes with multiple features, as you can schedule different commands, including alarms, notifications and file opening. Moreover, you can also use Sleep Moon Xpress for shutdown, reboot, log off or standby schedule jobs. Thorough customizations of commands For some of these automatic commands, you can choose additional settings. For example, if you want to set an alarm, you can select from various predefined sounds or browse your computer for a custom sound file. In the same way, when scheduling a notification, you have to set the notification window title and content. Multiple parameters to consider No matter the task, you have to set the schedule method and parameters. You can schedule the command by selecting a time and a date, as well as by setting a minimal download or upload speed. Thus, if you are downloading a file from the web, you can schedule your PC to shut-down or notify you if the speed is too low. Constantly displays necessary details The schedule details are also displayed, allowing you to permanently view the time and date or the download / upload speed. Furthermore, if you choose to set a time and a date for the action to be triggered, a countdown timer is displayed to let you know how much time is left until the command is executed. Extended accessibility with device recognition In addition to this, the program allows you to perform or schedule a background noise normalization process, in order to help you adjust your computer's noise level. Also, you can set the software to react when detecting WTP mobile technology or Bluetooth devices, thus enabling you to trigger one of the mentioned commands just by sending a file or typing the PC's IP address in an Internet browser. A few last words All in all, while using Sleep Moon Xpress poses no problems, it can prove to be a useful program, allowing you to easily remote control your computer, schedule tasks, use it as a reminder or an alarm clock. It comes equipped with so many features packed in an intuitive interface that it is useful for both at home and at work. Sleep Moon Xpress Screenshot:

What's New In?

Now you can program your PC using its USB port! Sleep Moon Xpress is an application that comes with a powerful Scheduling Manager, providing a large number of different and very useful Scheduling/Automatic commands. Some of these features include Sleep, Shutdown, Shutdown in X Minutes, Boot, Reboot, Log Off, Restart, Shut Down, Start, and Shutdown in X Minutes. The Scheduling Manager can detect when your computer is connected to the Internet and also to a LAN (Local Area Network). It can also detect and react to movements of the PC such as USB keyboard or mouse movement. It is very easy to setup and customize the commands. For example you can set an alarm, or start a task to download files at maximum speed at specified hours of the day and days of the week. You can also setup different web sites to be downloaded without leaving the program, and pause the download or change the maximum download rate. You can also use Sleep Moon Xpress to shutdown your computer, shutdown in x minutes, reboot, log off, restart, wait and boot, shut down in x minutes, stop, standby, stand by, or log off the computer at specified times. Not only can you schedule task to run automatically at specified times every day, you can also setup alarms to be triggered at specified times every day for example: You can set any audio file that you want to be played when the alarm sounds, and you can also select what should be said in that message. These features are all included with Sleep Moon Xpress. Sleep Moon Xpress Activation code & Review Additional Features: System Requirements: After downloading the program, unzip Sleep Moon Xpress.exe and double click the Setup.exe file to start the installation wizard. Follow the on-screen prompts to install Sleep Moon Xpress. Sleep Moon Xpress Free Sleep Moon Xpress is a free, yet powerful application. The program provides many useful features that let you easily perform different tasks on your computer. One of the great features is that it lets you schedule different commands to be executed on your computer at specific times. You can use the application to set a PC shutdown, restart and log off commands, for example. In addition to this, Sleep Moon Xpress is also capable of shutting down, restarting or logging off your computer when the program detects that your computer is connected to the internet or is connected to a LAN. This way, you don't need to tell the software when to run these tasks, and you

System Requirements:

PC: NVIDIA GTX 560/AMD HD 7970 1GB VRAM Intel HD 4000 1250 MHz memory 5 GB
