WRF Domain Wizard Free Download PC/Windows [Latest-2022]

What's New in the WRF Domain Wizard?

WRF Domain Wizard is a software that enables users to define and localize domains (cases) by selecting a region of the Earth and choosing a map projection. Users can also define nests using the nests editor, edit namelist.input, run the WPS programs (geogrid, ungrib, and metgrid) through the GUI, and visualize the NetCDF output. WRF Domain Wizard is also a built-in component of WRF Portal. WRF Domain Wizard stores its information in the standard WPS file, namelist.wps. This directory contains program and documentation. Program: WRF Domain Wizard (wrf.wps.nwrdfw) Namelist: WRF Domain Wizard (namelist.wps) Documentation: User's Guide (wrf.wps.nwrdfw.pdf) Readme.pdf (Readme.pdf) Namelist.txt (WRF Domain Wizard Namelist.txt) Exporter: WRF Domain Wizard Exporter (exporter.wps.nwrdfw) WPS: WRF Portal WPS (Portal_WPS_Release_1_3.zip) Examples: WRF Domain Wizard Examples (examples.wps) User's Guide user.guide This file is written in PDFCode, a portable document format suitable for technical publications. PDFCode is a document markup language that describes and implements a set of markup languages for the World Wide Web and other documents, with the goal of enabling computers to read the content, analyze the structure, and generate the presentation. If you have any comments or problems, please write to the WPS mailing list or send an e-mail to wps@....

Version 1.1 (2002-05-30) - fixed the "ForecastSurface" calculation to be compatible with newer versions of NetCDF - added GUI workbench and tooltips - reduced the size of the namelist.wps to be as small as possible - fixed bug where "Y" values of "NCG" and "DFF" coordinate modes were off by one - added USGS gridded 1/8 degrees global dataset to the WPS exporter

Version 1.0 (2002-05-23) - First Public Release
