Once you've got a handle on the basics, you'll be able to tackle Photoshop's more intricate features on your own. Power of Photoshop CS6 can help you get your skills up to a new level and take your imaging projects to new heights. How to Make an Image Mesh - Basic Tutorial Photoshop's basic layer styles are already great for turning your work into a piece of art, but in this tutorial you'll learn how to make a photo take on the appearance of a three-dimensional mesh. These exercises are a great foundation for advanced digital art projects, like creating your own 3D model from a photo or making a realistic bronze sculpture. If you want to go a little deeper, read on. Before Getting Started In addition to Photoshop, you'll need a photo you want to use as a model. Any photo will work; just make sure you add at least a single layer or two to make it easier to work on the image. Your photo doesn't have to be any size; making a small image will speed up the process a lot. You'll also need some Photoshop brushes. The more brushes you use, the more you'll customize your results and the easier it will be to make a photo look like a three-dimensional mesh. In Photoshop, head to Image | Edit | Define Brush Presets. You can save brushes to your computer or load brushes you've downloaded online. Remember to save your brushes with a descriptive name, like "Helmet" or "Wispy Hair." Get Ready for Some Fun Bring up your photo in Photoshop and click on the Select tool in the toolbar or press Shift + A to select the entire image. In the Select menu, choose Both and Ctrl+Shift+Alt+A to select only the visible areas of your photo. Move your mouse over your photo and you

Gameplay The BBS game is played by a team of one player and a robot. A player plays one "Robot" while the other player acts as a "Player". Each player in a game has a large amount of bonus points at the end of each turn. The core of the game is to move your robots through the four board sections towards the "Flags", by placing track pieces on the square tiles with the matching direction, by using the "Arrows", and by overcoming small obstacles, known as "Hacks", which are designed to stop the robots and reduce their bonuses. Reception In 1996, Dragon #191 rated BBS as number four among the top ten arcade game conversions. A spokesperson for the zoo confirmed Saturday that its latest polar bear cub has a fractured femur, and that the cub has been taken to the Ontario Veterinary College for rehabilitation. It's unclear whether the polar bear cub was attacked by its mother, and whether or not the attack was intentional, zoo spokesperson Janet Sayers said. But she said the cub's injuries were consistent with a physical attack by a polar bear. "If you look at the fracture of the femur, that would be inconsistent with a cry for help." The newborn, who was born on Oct. 11 at the Toronto Zoo, is estimated to weigh 6.5 kilograms (14 pounds). He's taken care of at the outdoor polar bear enclosure

Maxwell should stay in the long sleeve game, there are so many options and they are light weight. I prefer the neoprene moisture barrier over the one of polyester. The other advantage is that I don't have to worry about the fabric getting a bit to baggy with rain. I hope we can make that a thread, one of the best questions on the boards. I use a 5 mm knitted sleeve from the Reynolds army, it holds up pretty well for the things I use it for, it keeps the rain away, and I have a larger version for summer. It's a solid layer of protection for the arm with a draw string to secure the tube around my arm. I found out from a similar thread on the boards that some shirttails have also worked out well.A new report by Internet privacy experts has revealed a massive rise in "massive data hacks" which is resulting in sensitive customer and employee information being leaked to hackers. The report, from a coalition of experts including academics, industry, and government, has revealed a total of 678 data breaches so far this year, compared to 652 in all of 2014. "The frequency of massive data breaches in 2015 is the highest since 2009, and the 2015 data breach epidemic is not slowing down." The report, called "Data Breach Reports 2015: State of the Nation," was published at the end of last month and was authored by the Ponemon Institute, a non-profit organization that conducts research about data security, privacy, and information technology. The statistics come after it was revealed that Equifax, one of the country's largest credit reporting agencies, suffered a massive breach of its database last month that resulted in a total of 143 million customers being exposed. "Today, 81% of organizations are having some form of a data breach," said Andrew Storms, director of security operations at nCircle, in a statement. "The frequency of massive data breaches in 2015 is the highest since 2009, and the 2015 data breach epidemic is not slowing down. The large and often public data breaches, such as Target, are just the tip of the iceberg." The report revealed that the average cost of a data breach is $4.8 million, and the average time it takes to detect a breach has increased by 53 per cent to 77 days. �
