hi, I just got a driverless AOC TFT22W90PSA monitor, Windows treats it as a generic display, now I've been to aoc and . I did not find models with 22" screens in its database, and there I did not find drivers even for windows 10. I downloaded drivers for xp 32 bit but it won't connect to my monik. I tried on windows 10 and it won't connect, won't even start. I connected the monitor via VGA, now I can't switch to other inputs. And the problem is, what is the problem, that the computer understands that this is not a standard monitor, but a universal one. I want to connect it to my TV, but Windows won't let me.
