## **GTrends Made Easy Full Version X64**

While the Keyword Tool can be very helpful in an on-going project, sometimes you need to make a quick decision and need to know how many of your keywords are worth pursuing. For instance, if you have 10 keywords, you may want to know if any of them have the potential to be a "good" keyword or if you should invest some time into one of them. Or, you may need to know if a particular keyword has a high Google search count, because you know that any keyword with high Google search count will bring you some traffic. GTrends Made Easy allows you to see how many of your keywords are worth pursuing or not. GTrends Made Easy Features: 1) It runs very quickly. 2) It is free. 3) It is easy to use. 4) It processes each keyword. 5) It gives you a Google search count and a competing web page count. 6) You can choose to either see a simple report or a spreadsheet report. 7) It shows you all of the keywords in one place. 8) You can add, remove or change the keywords in a project. 9) It will show you which keywords need to be researched and which ones don't need any further work. 10) It will show you all of the keywords with your match type. The best feature of GTrends Made Easy is that it allows you to make quick and easy decisions on which keywords to continue researching and which ones to ignore. GTrends Made Easy Settings: 1) Once you enter your keyword, click the "Process Keywords" button. 2) Then you will see the Google search count and the competing web page count. If you click on the "Display Ranks" link, it will show you a graph with the Google search and competing web page counts for each keyword. 3) You can change the view by clicking on the "Display Ranks" link. You can choose to view by rank or to view by percentage. If you choose to view by percentage, it will show you the Google search and competing web page counts as a percentage of the total. 4) You can change the views, add new keywords, remove keywords or change the keywords. If you decide that you want to see which keywords need more work, you can add keywords to this project. 5) If you decide that you want to see how many of your keywords have an average search count of over 10 or

## **GTrends Made Easy Product Key Full Free X64 (Updated 2022)**

The GTrends Made Easy is a free software application that takes the concept of GTrends from the 30 Day Challenge and puts it on auto-pilot. You have two choices. You can do your keyword research either with or without using Wordze. It is simple to use. Just give your project a name and enter all of the keywords that you want to research. Then decide if you want to use Wordze or not and click the "Process Keywords" button. At that point, your work is done. You just let it run and it will automatically process each keyword and determine the Google search count and competing web page count for every keyword in your list. If you have chosen to use Wordze, then it will also process all of the keywords that wordze has for your given keyword, based on your match type. GTrends Made Easy is different from all of the other keyword research tools available. The GTrends Made Easy is the first and only keyword research tool that has the capability to automatically generate keywords from the fields in which the keyword was selected. It is the only tool that can use words that are the name of a file type in a word processing program. For example, if the file name is "you tube video" and the file extension is.flv then when you select the keyword "you tube video" GTrends Made Easy will use the term "you tube video" as the keyword. GTrends Made Easy will also replace the numbers at the end of the terms such as "on line " and "online" with the number that your internet provider gives you. Why GTrends Made Easy is Different: The GTrends Made Easy does not use special word lists. Instead it uses the actual words that were used to create the search term in the first place. When your enter the word in GTrends Made Easy, the tool uses the existing keyword that was selected in the GTrends Made Easy program and replaces it with the new word. The only words that it does not replace are words that are misspelled or contain special characters. In addition, the GTrends Made Easy will also take into consideration the entire search term as well as other keywords that are in the same search term that are the same and are not using all lower case letters. You do not have to enter all of the words that are part of a keyword in the GTrends Made Easy. Instead, enter one word and let the tool generate the other keywords. When you do this 77a5ca646e
