Album Express supports Windows 8.1, Windows 7, Vista,

What's New in the?

Album Express is an interactive album and music player for your computer, bringing to you a complete set of tools to create great looking albums and share music with your friends and family. Album Express is the perfect tool for creating custom album art, playlists, play notes and more. When Album Express is running in the background your computer will look like an expert DJ, playing the perfect mix of album from your computer's music library. Album Express offers a dynamic modern look and feel. When launching Album Express, you will be greeted with a big picture of the first track on the album that you want to create. If Album Express is launched as a standalone application or minimized to the system tray it will still look the same, but you won't be able to select and play tracks unless you launch it again. Your Album can consist of any type of media, from any file type to VCD's, CD's, DVD's, MP3, WMA, M3U or OGG files. It can be split into folders or it can be a single media file. With album art you can create custom album covers with a look that will suit your family, friends, or even your company logo! There are four main types of album art: Image, Image Album, Movie and Custom. You can select to display the album name or not, or even allow the computer to play the album as a background audio. With the two buttons in the bottom left of the application window, you can easily switch between different layout views: Grid, Detail, Summary, Grid Plus Detail, Folder Explorer and CoverFlow. All your settings are stored inside the application making your next session as quick as the first! Recording is very easy with Album Express. You can easily record any event on your computer, for example your favorite show on TV, or any audio or video feed. When recording your audio feed, you can choose to have it saved either as an MP3 file, WAV file, OGG file or M3U file. Of course, you can also record from your microphone. Album Express has a very simple user interface, and with it's over 100 built-in effects, you can make your audio recordings sound like the best DJ in the world. Album Express works with multiple sources, so you can record any source that you want like MP3, VCD, WAV, M3U, OGG, FLAC, AVI, and MP4

System Requirements:

1. Internet connection (wired or wireless)
2. MAC and PC compatible
