Though it's been around for a number of years, Photoshop's reputation has improved over the years, making it the most widely used tool on the market among content creators for image and other graphic design. A Brief History of Photoshop The first computer graphics program was BOSTR (Big OstroFist Stereoscopic Recorder), created in 1976 by Steve Mann and Ross McFarland at MIT. For the first time, the computer could create realistic looking images of the real world. There were many versions of the program, but the first version (1.0) was released in 1981. Early Versions of Photoshop The early versions of the program had to be purchased or downloaded from third-party sites. Over time, an online version was made available, followed by the self-contained program that was released in 1990. The current version is CS4 released in 2005. (Keep in mind that the version numbers do not directly correspond to the date of release, but they do indicate the major and minor releases.) The first version that allowed for some basic image editing was Photoshop 3.0 released in 1996, followed by Photoshop 3.5 in 1998. These two versions also came with some basic plug-ins. Photoshop 3.0 included enhanced filters such as the Hue/Saturation, Red-Eye, and Spot Healing tools; Photoshop 3.5 added the much-requested and extremely useful Smudge tool. (If you're interested in learning more about the different types of tools available in Photoshop, this article has a detailed list of the available tools.) A few other features of Photoshop 3.5 included the ability to export an image in a JPG or GIF format, a new burn tool for long exposures, and the ability to compress images (the program supported JPG and GIF format). Photoshop 4.0 released in 2000 made some minor changes, including a new print manager, better scan tools, and the addition of a Flash plug-in. Photoshop 5.0, released in 2001, added some new features such as the ability to apply image adjustments in a nonlinear fashion, create selections, and create templates, among other things. The new version also provided a Photoshop Elements program that included basic editing capabilities and a library for importing and organizing images. Photoshop 6.0 in 2002 added more features for content creators such as the ability to create animation and the Animation Panel. Photoshop 7.0, released in 2003, gained more features, including a

We welcome you to the Birding Trail of Massachusetts! If you are a birder who wishes to share your adventures, please sign up today, to be notified when the Birding Trail is up and running. The Massachusetts Birding Trail will trace the routes of birding hotspots and birding-related historic sites and use the Birds of Massachusetts website as a central repository for birds seen and birders known in the state. The state is in the midst of a major population boom, so the number of birding hotspots is growing. And the number of seasoned, knowledgeable birder along the trail is increasing. The Birding Trail will be “an extension of our protected areas.” (Quotes from the Greenfield Patch) The project relies on citizen scientists to provide eyewitness accounts, sightings, photos and tips. The trail’s “eye-witness” format will allow fellow birders to share their birding adventures. And non-birders will be able to learn about a few of the most interesting and distinctive birds of the state, and about the challenges they face in Massachusetts. Our site will feature up-to-date information about birding hotspots, birders, sighted species, and bird life in Massachusetts. We encourage birders to send in feedback, and to contribute their own bird sightings, photos and tips. The trail uses aerial photos, text and photographs by the Bird Report, a group committed to accurate and informative photo reporting. Sometimes it is as simple as “oh there it is!”, other times your lens can take you on a scavenger hunt to a spot that was previously unknown to you. We encourage all birders to take photos of all their bird sightings and share them with the Birding Trail. We wish you much enjoyment and discovery. Happy Birding! Thanks to Kathy T, who has created a terrific logo for the Trail. Be sure to check her work out! Thanks also to Elizabeth H, who designed the map.
