Remove the NetBus trojan from your PC. This is done by deleting the NetBus trojan from your PC using the BusJack program. NetBus is a trojan horse program that, once loaded on your computer, can allow pretty much anyone on the internet access many aspects of your system. The best way to avoid getting a trojan is to NOT run a program when you don't know what it does. In other words, be paranoid. It could save you a pain in the butt some day. For those of you who biffed, and mindlessly ran that program that Joe Shmoe sent you over ICQ, there's hope. Enter BusJack, the easiest way to remove the NetBus trojan from your computer. What is it? BusJack is a trojan remover that has the ability to delete all programs that use the NetBus trojan. This program scans your computer looking for NetBus programs, and if it finds them it deletes them with a click of the mouse. Is BusJack safe? BusJack will not harm your computer or other files. It scans all of your applications for NetBus files and deletes them. It will not hurt anything on your computer. It is safe and will not change or delete any of your files. How do you use it? You download the BusJack program, and simply click the "Scan for NetBus" button to begin the scan. BusJack will check your computer's registry and list any programs that it finds using NetBus. Once the programs have been found, a list of your computer's registry will appear with the name of the program. Click the registry key that contains the name of the application and then press the Delete button. A confirmation message will appear that informs you that the process has been completed. Click OK to continue, and the next time you start up your computer, BusJack will automatically remove the programs that used NetBus. What else can it do? Once NetBus trojan has been removed, you will be free to run programs without worrying that you might be infected again. The other benefit of BusJack is the ability to stop email and instant messaging programs from delivering their programs. For example, if you are not sure what an email attachment is, or what your instant message software sends you, BusJack will notify you when you can disable the message delivery service. General problems: BusJack will not restore deleted files. If you

System Requirements For BusJack:

Windows 8 1 GB of RAM Graphics: Intel HD 4000 or GeForce GTX 650 2GB or greater Storage: 8GB In the end, you can't knock the price of the headset - at £20 it certainly isn't going to break the bank, but it's unlikely to be a cheap device in terms of it's performance. Will it work with my Xbox? It is designed to work specifically with the Xbox One controller, although in theory the headset could work with any Xbox 360 controller by using a breakout cable.
