Contents show] History AutoCAD was originally developed in the 1970s for a product called Pentalog, which at the time was only sold to a few thousand commercial architectural firms. With AutoCAD, the company changed its strategy from selling hardware to selling software. In January 1982, AutoCAD 3 was released as the first major upgrade since the company's founding. The software no longer ran on microcomputers, but rather was written for large time-sharing computers. AutoCAD for small computers was released the following month, which was a predecessor to AutoCAD LT. At that point, the company had sold 80,000 licenses. This was a significant number, but not impressive in the context of the size of the CAD market at the time. On June 26, 1982, AutoCAD had an initial public offering (IPO), the second largest IPO for a technology company at the time. AutoCAD's IPO raised \$13.7 million. After two years and more than 100,000 licenses, the company had sold 230,000 licenses, a great success by any measure. In 1983, the company licensed AutoCAD to Hewlett Packard. Autodesk made the first full commercial offering of AutoCAD to the home and small business markets in 1984. Since then, sales of AutoCAD and Autodesk software have nearly doubled every year. In addition to traditional software license sales, Autodesk also sells post-market support, online training and content, as well as providing design services. Since the release of AutoCAD, the company has continued to add to its core product line, notably adding mechanical engineering, a web-based solution and apps for mobile devices. In 2015, Autodesk partnered with award-winning game developer Crytek to release a version of AutoCAD for mobile devices, allowing architects and engineers to work on-the-go. The release followed the success of AutoCAD for iPad and desktop. AutoCAD 2016 AutoCAD 2016 was released on January 31, 2016, after its predecessor, AutoCAD 2015, was released in November 2015. It was the first major release of AutoCAD for a few years. For example, AutoCAD 2013 was only a major release, with only minor bugs fixed and a few new features added. The release also marked the release of AutoCAD 2017, the most recent major release.

Glutathione S-transferase polymorphism and risk of cutaneous squamous cell carcinoma and actinic keratosis in middle-aged and elderly people in northern China. Cutaneous squamous cell carcinoma (CSCC) and actinic keratosis (AK) are the major types of skin cancer. Accumulating evidence suggests that the glutathione S-transferase (GST) M1 and T1 genes may protect against cancers of the lower digestive tract and urinary tract, respectively. This study was conducted to investigate the association of GST polymorphisms with CSCC and AK in middle-aged and elderly people in northern China. The prevalence of GSTM1 and GSTT1 polymorphisms in 436 patients with CSCC, 387 patients with AK, and 696 age- and sex-matched healthy controls was determined by polymerase chain reaction analysis. The results of this study showed that the prevalence of GSTM1 null genotype was significantly higher in patients with CSCC (42.8%) and AK (30.3%) than in controls (28.3%), suggesting a possible protective role for GSTM1 in skin cancer. The GSTT1 null genotype was also associated with increased risk of CSCC, but not with AK. Furthermore, GSTM1- and GSTT1-null genotypes were associated with different CSCC risk factors. Subjects with GSTM1-null and GSTT1-null genotypes had higher risks for CSCC in men (odds ratio [OR], 4.0; 95% confidence interval [CI], 2.5-6.4) and those with GSTT1-null genotype in women (OR, 2.1; 95% CI, 1.4-3.2) than controls. These findings provide evidence for the association of GSTM1 and GSTT1 polymorph

In a prospective study the diagnostic sensitivity, specificity and accuracy of pneumatic otoscopy was compared with other bedside diagnostic methods for the diagnosis of otitis media with effusion (OME) in children. The diagnostic sensitivity, specificity and accuracy of pneumatic otoscopy were 0.88, 0.92 and 0.90 respectively. A positive pneumatic otoscopy was found in 10 out of 11 children with OME and in all normal controls (P

Use either printed paper or PDFs (with fixed or variable dimensions) to easily incorporate feedback, comments, and even whole designs. Print, cut, staple, and send the feedback to your drawing. Enterprise Feedback Collection: Want to share feedback without printing and cutting sheets? Print your drawings with hidden CAD markup and see the resulting annotated drawing on a mobile device. (video: 1:17 min.) Convert Floor Plan to Blueprints: Add floor plan and section views directly to your drawing. AutoCAD 2020 Floor Plan to Blueprints simplifies the workflow of incorporating floor plans into your models, and makes it easy to share plan data with 3D printing services. Blueprints 3D are now automatically generated. Dimensional Drawing Import: Build dimensional drawing components to your drawings and import without additional steps. (video: 1:04 min.) Input Considerations and Control Markup: Use carefully placed CUI / ARLControls to guide users as they mark up their drawings. Create powerful UI controls and allow users to perform actions based on control markup. New Approval Settings: Limit view, edit, and modification of drawings in order to create a clean drawing. Set and enforce approval rules and let others review the contents of your drawings. (video: 1:05 min.) Drawing Bookmark: With the Drawing Bookmark tool, you can view and use more than one drawing at a time. For example, create bookmarks to quickly switch between your model, assembly, and design drawings. Under The Hood: Cadalyst – People who follow AutoCAD, CAD and CAE news and updates, are often interested in the software's development process. Our weekly summary gives you an up-to-date overview of our most important announcements from past weeks, which are then used to create the Cadalyst Release News. We continue this practice for AutoCAD 2023, and in addition, we will keep you informed about product features and changes that come to AutoCAD 2023. We, the readers and Cadalyst users, also have a big part in this process.
