C# (CSharp) DevComponents.DotNetBar.Metro.MetroShell - 2 examples found. These are the top rated real world C# (CSharp) examples of DevComponents.DotNetBar.{ "created_at": "2015-02-27T22:28:11.959477", "description": "A model-driven web app framework for ASP.NET", "fork": false, "full_name": "castleproject/Castle.Windsor", "language": "C#", "updated_at": "2015-02-27T23:42:15.219425" }Q: Avoiding multiple idle connections between code and Oracle Database I've read some of the questions pertaining to connection pooling and managed to get working a simple example. However, I noticed a huge issue that could potentially cause a load imbalance in my system. Basically the following: User authenticates against the server. Server creates a database connection to the Oracle database. SQL query is ran against the database. Connection is destroyed. The code repeats step 3 I'm running into the problem that every request is creating a connection pool for 1 user at
