Metric Conversion is a simple-to-use application that enables you to perform conversion between various units when it comes to length, volume, mass and temperature. It delivers the necessary and suffice options for carrying out this task, which especially comes in handy when you don't have an active Internet connection at hand. Simple setup and interface

The installation operation is a fast task that shouldn't impose any difficulties, thanks to the fact that there are no unfamiliar options displayed in the setup wizard. As far as the interface is concerned, the app adopts a standard window with a simple design and layout, split into four tabs for separately carrying out length, volume, mass and temperature conversions. Convert between various units Metric and imperial units are available for length, volume and mass, namely millimeters, centimeters, meters, kilometers, inches, feet, yards, miles, milliliters, liters, fluid ounce, gallon, milligrams,

grams, kilograms, tones, ounces, pounds, and stones. When it comes to temperature, you can find out the values in Celsius, Fahrenheit and Kelvin. All you have to do is type or paste a number in any field, in order to immediately obtain all remaining counterparts in the specified group of units. This task is performed in real time (as you type), so there's no need to click any buttons. Unfortunately, there are no options implemented for copying, exporting or printing the whole information. At most, you can select and copy individual numerical values. Evaluation and conclusion We haven't experienced any stability issues in our tests, thanks to the fact that the software application didn't hang, crash or indicate errors. It had minimal impact on the computer's performance, since it needed a low amount of CPU and RAM to work properly. To sum it up, Metric Conversion offers a straightforward solution for performing unit conversions when it comes to length, volume, mass and temperature. It can be easily handled by anyone.
