The Simple Stopwatch is a simple and efficient tool that helps you get a better understanding of your computer's performance. Simple Stopwatch is a Windows application that can be used to measure CPU utilization. With the Simple Stopwatch you can easily measure the time it takes for a given program or process to complete a task. In addition to time measurement, the Simple Stopwatch also allows you to capture the amount of time a program or process requires for a specific action. With these advanced features, the Simple Stopwatch can be used to help you determine the cause of slow program launches, and other things that could affect system performance. The Simple Stopwatch works on the same principle as Windows' "Time The Task" feature, with which you can measure the duration of any task in seconds, minutes, or hours. Note: The Simple Stopwatch is compatible with Windows 10, 8, 7, Vista, XP, and 2003. Kernel Manager is a freeware application that will help you optimize performance on your Windows PC, It does this by monitoring a PC's system calls and switching them between separate Kernel mode and User mode. In other words, the application allows one to replace the Windows kernel in favor of an alternate one. If you would prefer to get a software that provides you with the same functionality, but for an affordable price, check out [www.reliablebytes.com](http://www.reliablebytes.com). Here are some key features of "Kernel Manager": ? New Process Monitoring ? Hardware Monitoring ? Process Monitoring ? New AMD PowerPlay Monitor ? New AMD Power Mode Monitor ? New AMD Cool'n'Quiet Monitor ? New AMD DPC Latency Monitor ? New AMD Integrated Memory Controller Monitor ? System Switcher Screen Slaver Wizard is a program that can help you create different screen savers for your desktop. You can use the software to automatically change the appearance of the desktop when a certain program or user logs on to a computer, to show one single image when all users login, or to display random images on the desktop. Note: Free for non-commercial use. This is an application written for Windows Vista, in conjunction with the MS .NET Compact Framework Framework 3.5 and would most likely work fine on other Windows and Linux-based systems. This is yet another screen saver that brings a lot of functionality to the table. Created by the author,
