TweetSharp - Code Examples on CodePlex A: TweetSharp is an old library. I suggest using the Twitterizer library instead. It does all of the heavy lifting for you so you have to write less code, and it has better examples. A: I'd also recommend looking at "TweetSharp" (formerly a part of SharpTwit) - How to profit from blockchain
Blockchain promises to change the world of finance. It's already been proven in the field of digital currencies like bitcoin, and the potential applications are far-reaching and powerful. But, like any new idea, it's going to need time to work through the legal and regulatory hoops, establish its place in the market, and establish itself as an industry leader. The best way to position yourself for that success is to take advantage of the opportunity to invest early. Here are a few ways to do so. Do your homework The way to get the full picture of a new industry is to go where the customers are. Put yourself on sites like Reddit and Twitter. You'll get a feel for the culture and excitement around a potential new phenomenon, and be able to spot influencers from the ground up. You can also go to meetups and seminars in your area, and speak to people directly about what they want to see from a new blockchain system. Network with other early adopters and get involved in groups that are doing interesting things with blockchain. This will help you stay ahead of the competition. Learn to code It's one thing to be able to talk blockchain, it's quite another to understand how it actually works. An in-depth understanding of the blockchain technology will be crucial in the years to come, so get to it. There are some great online tutorials, but if you want a deeper understanding, investing in a coding book may

be worth considering. Make sure your finances are in order It's a good idea to run through your financial situation, and consider getting professional help if it needs it. There are online calculators available to determine if you're on track to achieve financial independence, and if not, which steps need to be taken in order to do so. You can also consider divers
