By the time of the annual lunch with Philip Hammond at the Tory conference, the newspapers are going to have run anything up to a dozen editorials for every day of the week and weekend. It was not a surprise to see the splash that appeared when he was found to have – he is not quite the wordsmith some seem to think he is – allegedly said to have a private moment with a woman who claims to be Julia Goldsworthy, a Conservative activist and journalist who had previously made a complaint against him of inappropriate behaviour. The Guardian newspaper’s submission, by the veteran political editor Nick Cohen, is always worth reading. It has hardly been completed by the time of the conference but a piece by Francesca Unsworth in the Spectator on the same day, was much more guarded, pondering whether to “believe the avalanche” of testimony about the chancellor’s failings. All of which reveals a very different picture from one outside Westminster – and, obviously, from the partial version of events that was reported in the London Evening Standard last week, which was picked up by the local radio station and the Sky News headline. The part about the allegations of a private moment and threatening to expose stories about a female political activist have been confused into “£10bn letter from Osborne” and “Blunt says he was not going to be PM”. There may even be a problem for Mr Hammond with some of the allegations made by Ms Goldsworthy, which would expose him to criminal libel if repeated. The most interesting thing about the story in the paper is that one of the sources it quotes is Dr Tanya de Grunwald, the president of the National Union of Students, in which role she is a lightning conductor for activism from the universities. She has also previously been an adviser to Alistair Campbell, the former Labour spin doctor – a source of endless slanders. The same goes for Lord Ashcroft, another courtier who hates the Tories – though he stopped being a Conservative voter after spending millions of pounds of his own money to defeat the Conservatives. He has also been called “a political and social slumlord”. These two characters have been hit up by the paper’s police source – who also reads the Guido Fawkes blog – for background. As if there were not enough antagonism between the sorts of people who run the organs of the Tory party, their contacts are to be found all over each other♦

Q: How to fix Password strength checking I have a code that checks if the password strength is enough based on the number of characters. It returns a String array, 1 is enough, 2 is too weak, and 3 is too strong. This works fine, but when the correct password length is four it still returns 1, which is not enough. I want to change this to just return 2 when the password length is four.

```
public class PasswordStrengthChecker { private String currentPassword = "Password123"; public int checkPass() { int best=0; int numberOfCharacters = 0; for (int i=0; i
