Lactose-enriched preterm formula has been shown to decrease the risk of necrotizing enterocolitis (NEC). However, its efficacy in an exclusively breastfed preterm neonates is unclear. In this study, we compared the efficacy of different lactose polymer-based low-calcium formulas for the prevention of NEC. In an unblinded, single-center randomized trial, NEC-susceptible preterm neonates were randomized to receive either a lactose polymer-based low-calcium formula containing an optimal amount of hydrophobic nutrients (OPT) or a lactose polymer-based low-calcium formula supplemented with additional calcium (OPT+Ca). The primary outcome was the relative risk of NEC between the two groups. Sixty-six preterm infants at a median gestation age of 28 weeks and a median birth weight of 880 g were enrolled into the study. The incidence of NEC was significantly lower in infants receiving the OPT than in those receiving the OPT+Ca (0 vs. 18.2%; P = 0.034). The relative risk of developing NEC was significantly higher in infants receiving the OPT+Ca (relative risk 2.4, 95% confidence interval 0.7-7.9). No adverse effects were noted in infants who received either formula. No significant differences were observed in the incidence of sepsis between the two groups (11.1 vs. 6.7%; P = 0.695). In an exclusively breastfed preterm population, NEC prophylaxis is more effective with OPT than OPT+Ca. "green", "environment" and "energy-efficiency". It's a carbon taxes-and-tribunals world. The Airborne Squadron, led by the legendary Marshal Luigi Guido Cesareo, is dispatched to chase the guerillas who want to form a secret army of terrorists and to eliminate them. General Gerardo Cevallos, the commander in chief of the Airborne Division, sends the Commanders to their designated airfields. The Airborne Squadron Commander, Garibaldi of Venice, is pleased to take the challenge, while Lieutenant Damiano of Florence, easily catches his attention. The latter, not being prepared, is soon sent flying and landed in the swamp, unable to move, together with the other Commanders, except for Colonel Fenice of Venice. Guido and the other Commanders are ready to battle against the terrorist band, and make sure to eliminate them in the best way. These pictures are from a recent visit to the Lake District, at Oulton, near Ulverston, Cumbria. The water is really very clear and I'd not realised until recently how many different species of underwater plants and animals are there - molluscs, small fish, crustaceans, some great whites, moray eels, small sharks and stingrays, otters, moray eels, perch, bream, gudgeon, pike, eels and a shark. The perch we saw were up to 5ft, other fish were 2 or 3ft, and there were moray eels, the whole aquarium was up to about 10ft deep, and there were different species in each part of the tank. We are really lucky, this is a place that everyone should visit. It was a bit cold but made wonderful colour for the photos. No comments: Post a Comment About Me I've been interested in photography for many years. Initially I had a 35mm Pentax camera that had a very conventional approach, but over the years I've bought a selection of digital cameras, many of which have helped to shape and inform the way I approach my photography. I've been working as a professional photographer in both print and digital media for the last 15 years. I'm very interested in the internet and the opportunities it provides for photographers and artists to connect with each other, share and collaborate, and to establish a professional presence..3 ± 0.4 Plant height (cm)
