User Reviews "An incredibly polished game, the pressure is on now for a follow up on the spectacular success of their first game!... A brilliant video game that sends up the abysmal state of our current generation games as a divisive, yet somewhat acceptable form of entertainment." - Indie Game Central The game looks to be akin to, but better than, the popular Crash Bandicoot series, featuring a lot of fun and novel gameplay, especially for an indie game. I think it will be a large success. However, I don't expect it to do very well. Hopefully Valve will release a platform version and that will help. Back in 2012

Diluvion: Resubmerged is a free-to-play, HTML5 browser game created by Kid Be Very Happy and developed in collaboration with Valve Software. The game invites players to explore the barren ruins of the great Diluvian ocean on a mission of epic proportions. Players encounter large-scale permadeath systems, randomly-generated maps, and unforgiving survival mechanics, all set in the heart of an underwater world currently collapsing in on itself. Players begin the game in a boat, which can be upgraded to better survive the harsh conditions and increase the speed of the boat, as well as give the player a better view of the underwater world. Through the course of the game, players encounter a variety of dangerous creatures, as well as numerous items to aid them on their journey. [30/07/2013]We've been working on Diluvion for a while now. It's always exciting to see people try out what we've been working on, and I'm pleased to say that our previous games have all sold well, and Diluvion has been well received. Even though the game is in its early stages, we've had some good feedback from the press and from people who have had a chance to try it out. One of our most common comments is that the game works really well, even if it does have some "quirky" bits. For example, one player has actually told us that they

## **What's new in Diluvion: Resubmerged:**

**Review #2 - Natural Selection I was a big fan of the first DLC here on the site. Because of that you may have missed the reviews of the other games that we've reviewed. You could always do a search but if you don't know what a search is you'd be lost in the ocean of results we're drowning in. Today is the start of a new series, "Diluvion: Resubmerged Reviews", where I cover three games from the original DLC that we've reviewed. Whenever I talk about the original DLC of a game on this site, I get a lot of comments calling me a liar. I don't really care about making anyone mad, it's just that I enjoyed the original game a lot and you should too. The games that I'm going to review, Resubmerged, do still have things in them that are new and exciting so it makes sense that I'd want to revisit them when I do get a chance. The overall story is the same but there are plenty of new challenges, gameplay mechanics and enemies to explore. There will be spoilers in these reviews so if you haven't played the DLC and don't want any spoilers you should just stop reading now. This series is useful if you don't like the original DLC but want to see how the rest of the game plays. I hope to cover the other DLC that these games came from that weren't on the original list and that they also receive reviews. Before I get to an overview of the gameplay and story, allow me a few words on the ratings**

**system that I use. All I do with ratings is what you see as a star system. If I really like a game I would give it a 4-star rating, if I think it's decent enough I'll give it 3.5 stars, and if I just don't like it too much I'll give it 2 stars. The system is actually one that is fit for my style of reviewing games and what I want to cover. If I like a game more than the others I give it more stars because it deserves it. Sometimes I'll be out of a system, and other times I may give a game a 1.5 as I don't really like the first half of it. I'll**
