- A short sweet anime-styled story about an loveable cat who goes on a journey to meet his "future" girlfriend. - The journey takes place in the girl's house as she has forgotten his name. - The player can choose any character from the wide selection of characters, however the control for the game only has mouse control - The story will follow with every character that you play - You can also play alone without following the story, or with the help of the story if you wish. - The more you play, the more interested you get in the game, and the more interested in the game you get, the more excited you will get in choosing the girl your cat like. What's Inside? - You will start by choosing a cat, then your player will travel to the girl's house to meet her - Playable characters: The girl with 5 different cat styles. - More than 3 routes to play - Awesome and detailed CGs - 3D backgrounds - What cat is your cat? - 5 unique cat styles - 10 different endings - Cute music - (Insert Anki for Shiny/Cute Tts) IMPORTANTLY: 1.No one but DRAWER will be allowed to post a translation. 2.Main menu is locked in Japanese language. 3.When you register, you will be giving your email only. How to Play 1.You can start the game by pressing the "Play button" on the main menu 2.You will be given one of the characters in the game 3.You can interact with the characters using the mouse to press a certain face. 4.If you like a character, just press the ♥ button on the girl! Note: \*The menu for character styles is locked in Japanese, however theres a method to unlock this system! [\*\*] NOTE: The method requires your current trainer and a keen eye! You will need to start the game and load a level which will highlight an arrow on the upper right hand corner of the game, click on this arrow for the menu, you will need to go to "Character Style Menu" You will need to find a character with the face you want for the girl, highlight

This game is made as a game very similar to the GBA-RPG "Title: Legend of Heroes." Regarding the game engine, it is different from the JRPG, since we use a battle system with random battles. Also, you can use any weapons and armor from the game you own. However, the story is created depending on the game that you played. Regarding other things, we have confirmed game content based on the concept by consulting fans. Character Design Kouichirou Higashi, the main character. He is a young boy who was found in a faraway place. He knows nothing about his past, but arrives in this place. Suguru Ichijou, who weaves the story together with Kouichirou Higashi. He is a mysterious man who sometimes comes to the place where Kouichirou is. There are also many other characters such as fruit smugglers, and Kouichirou's comrades who are also on his side. Basic Knowledge Game Development With the cooperation of the game development company "BUDDY Works" and the Osensei Fund for Umeda Kids. Main Field: □Graphics. An anime graphic style is used to create a unique setting. □Battle. A battle system with random battles is used. With a control method similar to that of the Wii game. □Interface. The main menu is created, and an interface that is suitable to use on the computer is used. □Level Design. The design of each area of the labyrinth has been created based on consultation with fans. □Music. The music was composed by Yuzo Koshiro, who is famous for composing the music for the "Tomb Raider" series. Game System □Battle System: The battle system with random battles is used. □Items. Various items, such as weapons and armor, and "treasures" such as books and food are used. □Character Growth. The characters grow in strength during the game, and their growth in terms of stats is different. □Random Number Generation: In random battles, the monsters change their actions, and battles are not determined by luck. Therefore, battles are variable. □Camera Function. The camera functions such as zooming in and out are used. A unique perspective of the Labyrinth and story are created with the different camera functions. □Camera System: The multiple camera functions are used. (12 camera
