The annual incidence is about 50/100,000, with a range of between 17 and 71/100,000. The mortality (around 40%) is slightly lower than the incidence. Considering the high risk of cancer progression and costs of treatment, health service interventions, that aim to reduce morbidity and mortality associated with cancer, can be planned from the prevention of CC. The present study was aimed to estimate the prevalence and the distribution of CC cases in Abruzzo, on the basis of multiple data sources. Abruzzo is a region located in central Italy, with a population of 1,519,862 persons. Between 2006 and 2008, 37 cases of CC were detected and treated in Abruzzo, representing one case for every 3.7 thousand inhabitants; the crude prevalence rate was 1.2 per thousand. The average age at diagnosis is 67 years, and men and women were equally affected. The incidence of CC is high in men and in the elderly, despite a low prevalence of colonic screening.I know. I remember my first day and I got a doorbell. I was so excited, because I had no idea what it was. I still don't, but it has a handle and a little bell inside it. I went to ask my mom what it was, she said it was probably a man on
