Smashwords: We are all in favour of paid mod, but, why it is not possible to level with your craft? You should be made possible to level your ship with crafts. Because it was made possible in games like the famous Half-life. Hi there! I just started playing Trackmania with the new update and I have a question. I choose my camouflage color and as I can see there are some different classes. But when I click some of them (especially the racing one) it doesn't change my class. And I don't know why. Can someone help me? Do you know any game which allow you to add your profile name (incl. in the profile picture, your games info, and so on) and select a

username and it will show up all the info that belongs to your profile like in the forum? Because if I want to change it, I have to create a new account (and I always use the same username) I like this game because the more I play, the more I get. This is the first time I play this new eergeia. So fun and addicting. I hate the bugs and the glitches but I love the gameplay. I think the developers should make a game where you go through the galaxy with your enemies shooting at you. Don't have to race but just something that you have to clear. Hi everyone, my name is Matt and i love TrackMania! Before the update, trackmania is a very good game. The graphics are good, the level of detail is very good, and there is a lot of tracks. But the update, not only changed the graphics, improved the level of detail, and changed the game's design, but made the tracks more boring. Every track is the same, you just have to beat a few times the same obstacles (jumps or obstacles), the same map changes (similar levels), and the same track. But before the update, the game had a lot of variety, and I have more tracks to choose from, and

Today, people take their cars and passengers for a spin in luxury over short distances, day after day in the same direction. But perhaps you would like to experience the sensation of the wind flowing through the hair, the scent of the setting sun in the evening or the scent of the newly mown grass in the morning. The simulation game MyCars-Driving Simulator lets you travel into the car. Choose the desired starting point and enjoy the realistic engine sound and dynamic look of the car. Get your passengers in the right seat for the perfect experience in the driving simulator: You can drive cars with rear, front and left or

right side doors (and even via helicopter). Make all your passengers happy while experiencing a relaxing drive or make them jump out at the first stop. And: Create your own driving routes. For example: You could choose a route with a series of stops at the most beautiful places in the world, or one where you can try to drive as fast as possible, or perhaps it is the most speed-oriented world marathon. Your choice – just create your own driving routes in your private world in the app. In the game MyCars-Driving Simulator, you can play with a partner or with other users via internet.

Game features: Enjoy a driving experience and its effects on human life in a dynamic simulation: Your passengers will experience extreme emotions and mental states depending on the route and the mood of the driver Choose your own destination: The world of MyCars is a dynamic driving simulator world. With the app MyCars-Driving Simulator, you can travel through the land of MyCars and experience a life in the car. Choose the most scenic routes or drive around in the world marathon. Especially designed interfaces: Experience a driving experience that is vivid and realistic. Even the smallest details of the car are reproduced in detail in the game. Special effects on the screen surface,

the windshield and the steering wheel allow a realistic driving experience. Full of surprises: At any time, your passengers can become happy, angry, unhappy, calm, excited or afraid. Feel and experience the emotions of your passengers in real time. Make your passengers happy while driving for a long distance or make them jump out at first stop. What's new: Join the community and get access to the growing range of things that interest you in the game: There is now a quest in the game, c9d1549cdd

Come visit and see my reviews of my favorite games on the iPhone! iPhone / iPad | Game Info Game Play Dj Vu, a scifi puzzle-platformer where you rely on the actions of your past to shape your future. Take control of Grant, who will create clones of himself based on prior recorded actions. These clones will help him escape traps, open closed paths and traverse a world that can play loose with the laws of time and physics. Trapped in the future, Grant must collect relics from his time to power up an experimental time machine that may be his only way back to his life in the past. Along the way he will master the machine's abilities, creating past versions of himself to help him overcome his obstacles. This is my first game on the App Store so I hope it gets some feedback and maybe it'll even be on your App Store games list! Developer My name is Sebastian Rahmer and I'm a programmer from Germany. I've created Dj Vu as my first iPhone game. I've worked a lot on it and made it up to the point where I'm really happy with it. I'm a lot more of a backend programmer than a frontend programmer. I feel

like I'm bad at the game design part so I'm happy that I don't have to worry about that. I'm happy about every aspect of the game but its probably best if I leave it to the people who really know what they're doing. Is there something you'd like to say about this game or the journey to get it here on the App Store? Anything I could say about this game would be lame, so here's a much better question. Have you ever played Portal? I hope you're at least familiar with the mechanics. The puzzles are almost completely based on the Portal mechanics, with some platforming thrown in. I'm quite proud of the platforming and I'm proud of the dilation mechanics as they really add to the puzzle-action of it all. If you haven't played Portal, I definitely recommend it. You can even find it on the iPad if you search it up. If you want to have a look at my games and see some other screenshots, you can check them out here: Cheers and good luck on your games, Sebastian. If you get any feedback or

A one-touch operation! **Gimmicks Highlights:** Trigger action Extra foam filler Sterilized, self-winding from anisotropic polymer composite fibers of molded plastic Use with Poly-How to add a gleam to the crimp, coil, fingerplate or shaft, to name a few, simply draw these away from the wire strand they ride on and create a beautiful matt finish. Prep the strand for metallization by coating it with the stain. Strike a bright spark with the photo-shine, or the burnish. "Made in the USA" terminal box Graphite in iron oxide, sulfur and carbon are used on our products. Different coating thicknesses and finishes are used for photographs, flame, and photo shine. Each terminal is primarily used to create the design, which is stamped on the surface of the terminal. Subjecting the terminal to one or several of the coating options will change the stamp. **Features:** Each product is die-stamped with a professional looking picture from the STAMPARTS™ unique gallery. This extra value is the number one consideration in the Decorations design process. Three styles are custom-designed and die-stamped from laminate for a high-impact surface finish. Bring your message home to

the wire. Let your wire stand out. STAMPARTS™ decorative terminal caps are a great way to add variety to your wire without changing its color. Each terminal is die-stamped with a professional looking picture from the STAMPARTS™ unique gallery. This extra value is the number one consideration in the Decorations design process. Our decorative caps come in three styles: Photo Matte, Stipple and Black Hydrated Metallic finish. Nickel-Chromium Cable Terminals is a revolutionary product, less wires is less production, less strain, less cost, more independence.
