RD Sharma - complete solution for Class 12 Maths (2013 Edition).Prevalence and severity of hypoechoic germinal layer of rectal mucosa in subjects with anorectal symptoms. To determine the prevalence and severity of hypoechoic rectal mucosal layer (HRML) by using endoscopic ultrasound (EUS) in subjects with anorectal symptoms. The subjects were recruited consecutively at Department of Gastroenterology, Sattamalaya Hospital, from November 2010 to November 2011. They underwent full colonoscopy, and EUS examination in the rectum in three different locations. The findings were compared with the findings of endoscopy and pathology. Among the 161 subjects, 87.1% (n = 139) were diagnosed as having no lesion in the colorectal region. The rest had either focal colitis (13.9%; n = 23), proctitis with solitary rectal ulcer (0.6%; n = 1), polyps (4.9%; n = 8), proctitis with multiple/diffuse ulcers (0.6%; n = 1), and polyps with ulcers (1.2%; n = 2). EUS examination identified HRML in 2.9% (n = 5) subjects. The mean EUS depth of HRML in 5 subjects was 5.3 mm (range, 3-7 mm). The depth, width, and area of HRML correlated significantly with the severity of proctitis on EUS examination. EUS identified HRML in 2.9% subjects with anorectal symptoms. With deep rectal biopsy in HR

The incident happened in the Springmartin area just before 1pm today. One local, who asked not to be named, said a 40-year-old woman was attacked by four men and a woman during a dispute at a house in the area. He said: "The woman was stabbed in the leg in the kitchen area of the house and was stabbed around the neck. "She was taken to hospital where she was treated for a number of cuts and stab wounds." Sinn Fein councillor Keith Carson said: "I'm horrified by the news that a woman has been attacked, assaulted and stabbed in the Springmartin area. "I'm calling for a thorough investigation into the incident." 4.0.0 org.sakaiproject distro 22-SNAPSHOT
