Some highlights and changes, as explained by the developer: “When you control a player in FIFA, it’s a snapshot taken from the player’s viewpoint. There’s no data from the player’s movements in the game world. We’ve implemented a brand new animation system called “HyperMotion” to give our players the feel of what it’s like to play with a game controller. It will help us to create more natural and realistic reactions. “A new feature, where players can use the left stick to give their players a different motion. For example, you can lean into a pass with your left thumb, or even propel the ball with your left foot. “Another new feature called “interactive animations,” where your players can change their movements depending on the scenario. You can make a player lean to head the ball for a tap-in, or bend the knees for a run, shoot, or fake.” The developers explained that FIFA 22 will have extensive post-processing options and new features. They will be able to modify the lighting, shading, textures, and visual effects. You will also have the ability to have dynamic reflections enabled. We can expect more of the same on FIFA World Cup content, except this is the first iteration of FIFA World Cup’s lighting effects. There’s also a new motion capture system, which collects data from 22 real-life players playing a complete, high-intensity football match. The data collected from player movements, tackles, aerial duels, and on-ball actions is used to power FIFA 22 gameplay. The new game engine in FIFA 22 is more detailed and realistic than ever. For example, facial animations are more natural, crowds of thousands have been recreated and have been equipped with new physics, and the new jacket system allows players to have a better sense of the weather. Developers have also improved the ball positioning system. Apart from this, other major improvements are related to player likeness, multiplayer performance and controller interaction. A major overhaul of the visual look of the game can be seen in the numerous screenshots the developers have shared over the past few months. The screenshots show the new facial and hair animations, the new player likeness model and the new player creation tools. The new player likeness system allows you to create specific players such as yourself. The “look, feel, and mobility”

What's new:

- **FIFA 22: A brand-new 'Replay Improvement' system brings you new ways to rewind the game and discover more about it. The new post match menu gives you an even deeper look at the details of your match. Ranking is a new system for FIFA 22. It's an all-new way of tracking which players your team is most successful against. Rank each player in 30 Minutes Matches, 15 minute Matches, 10 minute Matches or 5 minute Matches.**
- **AI TEAM TRAINING: The new 'Player Intelligence', or P.I., in the AI players will choose the setup that matches the player, conditions and skill level you're playing in. It can prepare attacks and make adjustments to match those of live opponents. You will also notice the new included 'Intelligence Pattern (I.P.)' feature. As you score, the I.P. can select attacks dependent on the position and circumstances. AI intelligence will change as you play, not be stuck to predetermined patterns of play.**
- **GAME CONTROLS: This year FIFA 22 is more immersive with advanced and intuitive controls. Access to the new "Control Panel" with these settings: - Player 1: Indicates which player is in control. - Player 2: Indicates the second control position. - Player 3: Indicates the third control position. - Player 4: Indicates the fourth control position. - Player 5: Indicates the fifth control position. - Player 6: Indicates the sixth control position.**
- **BREAKING CHANGES: A new footpassing system allows you to pass the ball forward more quickly by quickly bending your knees when approaching the ball. This will help you move the ball forward. In addition to the new direction changing of the ball, you'll notice this year's 3D, Ball Sense.**

-
- The inclusion of Ball Sense will make passes feel more natural on the pitch and it's more responsive and accurate.**
- **WEAK INITIALS: Players with weak initial control have been given new animations that improve their kicking. Additionally, when players lose the ball, they will attempt to control the ball at different locations in order to break free without knocking it out of play**

For the first time, every aspect of the game has been completely rebuilt from the ground up. Players now have a new layer of responsiveness, making them feel more like the real deal. The most visible improvements come in the form of new animation and player intelligence. Players now react to shots, challenges and opposition, all while reacting and responding to other players on the field. The game has also been given a new soundtrack, with every environment and gameplay moment now voiced by an authentic cast of footballers, allowing you to truly appreciate the beautiful game. In addition, these improvements are reflected in all 14 teams. From the creators of FIFA 17, the AI has been given a suite of new coaching features to create a more varied, unpredictable and instinctive approach to play. New adjustments to the way teams take possession also allow you to tailor your tactics to your preferred style. And of course, you'll notice a host of other new additions such as Relegation, Leagues and Play-Offs; all designed to create more of a social and competitive experience in-game. With the introduction of six new stadiums and dozens of new 3D models, this will be the most authentic FIFA you've ever experienced on PlayStation 4. When is FIFA 22 available?
