In 2016, as part of its financial performance, Autodesk announced that it was ending its AutoCAD subscription service. Autodesk was losing money on its AutoCAD subscription service, and believed that offering it as a hosted service would give users more flexibility in choosing how to pay. Autodesk made a transition offer that would allow users of the current AutoCAD subscription service the option to purchase a subscription to Autodesk's cloud-based subscription platform, called AutoCAD 360. New customers could upgrade their subscriptions to AutoCAD 360 at the same price as the AutoCAD subscription. This offer was open to new and existing AutoCAD subscription customers. Earlier in 2016, Autodesk discontinued its AutoCAD college edition subscription, AutoCAD LT. Autodesk announced that AutoCAD LT will be replaced with the AutoCAD 2020 software application, which is expected to be released in April 2017. Autodesk's AutoCAD subscription (sub) service is the AutoCAD cloud-based service which was introduced in 2012. AutoCAD's ability to import and display multiple types of files, various drafting techniques, and a user-friendly interface have made it one of the most popular CAD programs. AutoCAD is designed to be used as a drafting tool, creating architectural, mechanical, and electrical designs. The most recent release of AutoCAD, AutoCAD LT, is available for users who want to create drawings with a limited number of features. The main programs include the AutoCAD suite, drawing tools, standard drawing options, and drawing templates. The main programs are installed on all versions of AutoCAD and allow users to enter text, build walls, line objects, and move, rotate, and scale them. AutoCAD also includes a drawing template library that allows users to create drawings from a set of predefined layouts. AutoCAD is available for use on Windows, macOS, and Linux computers. It is available for purchase as a perpetual license or perpetual subscription, depending on the type of license that a user wants to purchase. A perpetual license is licensed for a specific computer and software application, whereas a perpetual subscription
