I want to get the xml above into a table. I have tried something like: select 'R' from OPENROWSET('Microsoft.ACE.OLEDB.12.0', 'Driver={Microsoft Visual Basic Scripting Edition 6.0}; DBQ=C:\Users\Administrator\Desktop\Coding\Tests\MyTest.accdb; ') But it is saying I can not use a variable with the 'from'. A: Try this: select 'R' from openrowset('Microsoft.ACE.OLEDB.12.0', 'Driver={Microsoft Visual Basic Scripting Edition 6.0}; DBQ=C:\Users\Administrator\Desktop\Coding\Tests\MyTest.accdb;', 'select ''' (Thanks to kishan1471 for the correction) Scientists find new way to test which brain cells behave like dendrites - upen ====== chowes If I had to put a billion in on all the patients who suffer from some form of amyotrophic lateral sclerosis, I'd say the research is awesome. I don't think this will stop the degenerative and crippling conditions though - the relationship between some proteins and the progression of the disease really make me think this could be

useful in the early diagnosis of some diseases. Even on a smaller scale, such as neural networks, every layer of the computer is basically a machine that is doing a little more than the last layer - this paper gives me the impression that the human brain may be more like some master problem solver and less like a network. I'm thinking that if we can get a huge enough catalog of brain cells, we could simply 'grow' it from a brain sample with a certain type of cell we want to investigate or perhaps seed a brain with a specific cell type. As long as it's unregulated I think that would be the most ethical thing to ever happen, but even when

It was formed "with the object of collecting funds for the development of the Ashram, to ensure its proper management and to protect it from misuse". The trust was charged with the management of all ashrams in India. Besides the original ashrams, there are five other ashrams—Kanchipuram, Kumbhakonam, Kurukshetra, Kurukshetra (Kerala) and Somnathpur e79caf774b

It is a tributary of the Guadalupe River. Often called the "Queen of the Rivers" during its journey to join the Guadalupe, it is a three-river journey to get to the river. It is a true mountain creek, formed by a complex system of erosion in the region. The historical trading path was formed by the availability of good water for crops, good air to support livestock and available wood for cooking and heating. The Serrano were an important group of Native American tribes in the area. They were primarily Southern Paiute, other Indians of the Southwest and Apache. They lived in the canyonlands for 1,000 years. With the Spanish conquest of what is today Mexico in 1530 came the arrival of the Spaniards in Texas, a group that included Father Serrano. The Creek is also rich in wildlife. Comfortable campsites are found along the creek just as they have been for thousands of years. Anglers can fish the creek for trout from Spring to Fall. Trailers, large RVs and full size campers can find a comfortable home along the banks. Trails are accessible from the side road off of I-10 in San Angelo. Additional access is on the East Fork of the San Angelo River which

branches off from the Creek in Williams Lake.Q: Displaying multiple rows returned by a query based on a condition Following is my code SELECT
