Swift Williams was born in Pasadena, California on
October 24, 1927. Swift began drawing at a very
young age. The family owned a gas station during
Swift's early childhood and at a very young age
Swift was allowed to go to the Shell station to
draw for his own entertainment. Like most
children of the era Swift was allowed to do his own
thing and that's how he drew. Swift's early
drawings were rough and unpolished. At an early
age Swift was given his first train layout by his
mother and began building models at age four.

Swift attended Pasadena Art Center for four years beginning at age 12 where he was taught realism. Swift loved drawing, playing sports and getting into trouble. His favorite subjects were architecture and drawing. Swift entered the U.S. Air Force during WWII and served his country in World War II for four years. Once Swift finished serving his country he returned to the art of his childhood and began to draw in earnest. Swift's style became more refined and is still a part of his style today. Swift left California and moved to New York City in 1950 where he studied painting at the Art Students League. In 1952 Swift moved to Washington D.C. to attend art school at the Corcoran School. Swift lived in Washington D.C. for three years and in 1955 moved to California. Swift began doing exhibitions in the early 1950s and continued doing those until the mid 1960s. In the mid 1970s Swift Williams began doing exhibitions again. Swift's work is in private and public collections. Swift Williams is one of the most respected artists of today. His work is fascinating and his excellent design work is a pleasure to look at.
