uView Lite is a free media player application, which allows you to play multimedia files while working with other applications on your Windows system. The software is capable of playing media files from local folders or streaming videos from a variety of hosting websites. This way you can watch your favorite videos while playing games or working. Optimized window for multi-tasking uView Lite is a reliable application which enables you to watch videos while working, without the hassle of resizing the video window all the time. The media player features an adjustable window, which you can move to any location on your screen or resize in order to fit your preferences. The window is set to stay always on top and supports transparency adjustment. Moreover, you can lock the windows size and position, in order to avoid accidental changes. Additionally, while streaming a video from a hosting website, you can easily acquire general data, such as video URL, the URL at the current time or embed code. All the video options supported by the hosting service are also available when streaming content with uView Lite. Video streaming and media player tool uView Lite allows you to stream videos from websites such as YouTube, Vimeo, Twitch, Azubu, HitBox, Netflix, Youku, Dailymotion or Facebook. You simply need to select the desired domain, then copy the video URL to clipboard. The program can instantly import it and prompt the media player. After closing the video, the program remembers the most recently streamed item. Alternatively, you can load a media file from a local folder, using the menu at the top of the main window. The supported file formats include MKV, MPEG, WMV, AVI, MP4 for video and MP3 for audio. Adjustable interface uView Lite allows you to adjust both the video player window, to the size, location and transparency level of your preference, but also the main window. It features a double interface: the default mode and the minimized window. A dedicated button near the upper edge allows you to quickly switch between the two modes.

Q: Maximum number of rows in Oracle? Is there a limit to the number of rows that can be inserted in an Oracle table using the "INSERT INTO..." syntax? For example, can I insert 1000 rows in an Oracle table (with any schema)? A: There is no specific limit, as with most other database systems. However, the maximum number of rows that can be stored in a relation is dependent on your storage space. If you have plenty of space, you can add data to that table. In case of Oracle, you can specify the number of rows that can be inserted, in a specific amount of time, or as a set of tuples. It is all stated in the documentation.

Britain's Foreign Office is still looking for two of its former diplomats who have been missing since last week. The pair were reported to have been last seen Thursday. Ben Pruess and Sam Palmer, who have worked at the British Embassy in Havana, are

both British, according to Spanish newspaper La Vanguardia. Brexit dominates as UK government 'faces review of all remaining ties' with Britain Laura Marcus, a Foreign Office spokeswoman in Washington, was unable to confirm whether they were still missing. Marcus said she couldn't offer more information about the matter at the moment, adding she expected
