"RPGs have had longer development cycles than other genres. Take the Nintendo 64 game, Final Fantasy VII. It came out in 1997 and its successor Final Fantasy VII - Advent Children, which launched in 2006 — over a decade after the original — is the only real update. The same goes for the games released on the PS3 and 360. No change, no improvement. There is a reason for that. Simply put, RPGs have had to balance two things: delivering a solid gameplay experience and crafting a story that players can care about. RPGs need deep gameplay, but they also need memorable stories and characters. It's a tough balance." Link - "Now, Final Fantasy VIII also pushes the dramatic limits of this formula, and it's a fun ride. And now, sixteen years later, Square Enix is bringing us Final Fantasy IX — the RPG that many who played Final Fantasy VIII consider their favorite in the entire series. It's a strong addition to the Final Fantasy library for that reason." Link - KEEP WATCHING FOR NEWS AND REVIEWS. UPCOMING ENJOYMENT: COLLECTIVE MODE COMPETITIVE PLAY-BY-ELECTRONIC-MEANS "The multiplayer aspects of Ragnarok Odyssey and Final Fantasy XV, as well as Shadow of the Colossus and Monster Hunter Generations — these are the games that players are talking about the most for multiplayer. Compete with thousands of other players for prizes in a cooperative mode, or vanquish opponents in a competitive mode." "You've faced dozens of monsters in your journey. Now, it's time to let others face the same challenge with you. Join thousands of players from all over the world and face off against the monsters together." FINAL FANTASY XV CHARACTER DEVELOPMENT BOOK "The FINAL FANTASY XV character development book — a content-rich player's guide that will help you familiarize yourself with bff6bb2d33

For example, you can cause an attack beforehand, and then quickly gather your allies together to attack the enemy. Attack the enemy with various techniques Discover attack methods that the enemy is vulnerable to, and depending on the enemy's level, you can develop attacking methods that will sink its guard, such as a two-sword counterattack or a melee blow that puts it into a trance. When preparing for a fight, for example, put your melee attack in the first slot, and then create a prepared mixture that may knock out your enemy in one shot. Friendly Fire ----- Friendly fire does not affect you when you use the area map, but the enemy will be weakened by this, and you will be able to sense the location of the friendly character. Search for information about the enemy to know their abilities. If you have a low defense, stay away from the enemy. Lose, and enter the "Soul Arrest" method. I haven't ever seen an old app before so I'm unsure as to whether things are written right or left. I've searched and found a few old links but they don't seem to address how complete the relation is. I would make a comment for each below for brevity. Sample app in question has models followed by associated controllers and I have the '...' for a comment on the topics_controller file has the fk for an individual following that gets the association in the user.rb file in my notes_controller Both lose a lot of functionality and leave me with an object that isn't very useful to show on the frontend. user.rb has the user id fk which is needed for creating posts and the \$user_id scope in notes_controller models user.rb has_many :followed_topics, foreign_key: "followed_by" notes_controller has_many :people_notes, :as => :people, :foreign_key => :people_id has_many :topics, foreign_key: "topic", class_name: "Topic" user.rb has_many :people, through: :followed_topics, source: :person models user.rb has_many :notes, foreign_key: "person_id", dependent: :destroy, class_name: "Note" notes_controller has_many :people_notes, :as => :people, :foreign_key => 'user_id' Would it be better
