The free version of XPS Viewer can be downloaded from the link below. XPS Viewer 3.0.1 (fix WIDTH error) An XPS Viewer for viewing and printing XPS documents and exporting them as PDFs. XPS Viewer is a special electronic paper format that is developed by Microsoft with the intention of providing you with a reliable and secure means of saving and sharing data. XPS stands for XML Paper Specification and offers high performance printing for printers. XPS is said to excel in high-fidelity output, enhanced colors, as well as a boost in spooling and rendering. The files also provide you with improved security for whatever information is stored in them and for this reason you could imagine that this type of file isn't all that easy to open and view. XPS Viewer is an application that allows you to not only open

## What's New In XPS Viewer?

- Convert XPS files to other formats. - Open XPS documents. - Preview XPS documents. - Print XPS documents. - It supports XPS 1.1 and 2.0. - Allows you to change the format of the file. - High quality and ease of use. - Creates a separate directory for each file. CXCMS is a free open-source web-based Content Management System, with an emphasis on multimedia. It is cross-platform (runs in any browser), customizable and extensible, and is based on PHP, JavaScript, Java and MySQL. It also includes a small web-based content management framework. Some of its features include: - Comprehensive User and Project Management System - Simple multipurpose WYSIWYG editor - Embedded Flash media support and support for the FileCore image management system - Web-based database management for easy of use - Nested file trees and content filtering - The CX system was developed by a team of experienced software developers based on solid experience gained in open source platforms, and was further developed using components of other open source CMSs. - This project started on August 1, 2002 and later released on the official CXCMS homepage ( - The current release is CXCMS 2.0-beta1; the final release is scheduled for November 2006. - The code was cross-tested and code-reviewed with two commercial CMSs: CMS Made Simple and TinyCMS. - The community is of only three core CXCMS developers and four occasional contributors. - Most issues and support are provided through the email support list ( - A public user's forum is located at the project's homepage. - The Project Homepage can be found at - The Team Homepage can be found at - The Sourcecode Repository can be found at CXCMS Features: \* Standalone CMS/Gallery, Web Articles, Web Gallery, Web Page, Webbook and Web Database \* Multi-User, Member-Role-Based, Administration and Filesystem Permissions \* All files are stored in
