Because it uses a 2D array, as opposed to a quadtree, a DXF file can be directly loaded and displayed in AutoCAD, and the DXF file can be saved in the standard CAD format. The vector format is AutoCAD DWG. LISP and Visual LISP AutoCAD provides a programming language, called LISP. Visual LISP, or VLISP, is a visual editor for LISP, built into AutoCAD. VLISP was a beta product. It was released in 2009. AutoCAD supports editing LISP in either the Visual LISP or the Command Line LISP environments. AutoCAD also has Visual LISP versions of all of the program's most basic commands. These include: 2D and 3D objects Modifiers, such as dxf, dbp, dgn, dxf Layers Workplanes Object snaps, geometrical constraints 3D views Custom commands 3D constraints The ability to create your own AutoCAD macros In 2013, Microsoft released a version of Visual LISP with support for C#. AutoCAD supports two LISP programming environments: The Command Line LISP environment, which runs in the Windows command line. The Visual LISP environment, which runs in the Windows desktop. AutoLISP AutoLISP is a programming environment used to create AutoCAD scripts. AutoLISP programs are loaded when the AutoCAD drawing file is opened. AutoLISP is the only scripting language directly integrated into AutoCAD. AutoLISP is very similar to Visual Basic. It uses a BASIC-like dialect for its language commands. AutoLISP programs run during AutoCAD's program execution, and can be either interpreted or compiled. Interpreted programs are executed while the drawing is displayed. Compiled programs are compiled in memory, and then executed when AutoCAD is in a "stopped" state. AutoLISP programs are saved as.alp or.bpl files. AutoLISP contains a Visual LISP-like visual editor. Visual LISP is a part of AutoLISP. AutoLISP programs can be modified using the AutoLISP visual editor, which is used as a windowing tool. The af5dca3d97
