The main biological and medical implications of Darwin's theory of evolution concern the changes that have occurred during human evolution and the different biological systems that sustain human beings, including the human genome. We believe that Darwinian evolution mainly affects the human body, maintaining the evolutionary pressure on the human genome, which suffers effects of various types of mutations. To what extent this theory, through the genetic mutations, may impact our health and our daily life is unclear. Enter the following in the Title field and set them to "faux":Q: Update id of foreign key in Laravel I have a Laravel project with this table: +-----+ | id | real\_id | name | +-----+ | 1 | 3 | Harvard | +-----+ | 2 | 3 | Dartmouth | +-----+ I have a form that allows me to change the name, but the form needs the id, so when I change the name I have: \$request->id = 3 How can I get the updated ID of the foreign key? I want to do something like this: \$request->real\_id = \$request->id; Any idea? A: You can't do that directly. You should use the mutators provided to Laravel that takes care of that for you. For example: real\_id; } public function setRealIdAttribute(\$real\_id) { \$this->real\_id = \$real\_id; } } You can read more here: 6d1f23a050
