better way to pass an already opened PDF file to a control in my Winforms app Currently, I am passing in an  
already opened PDF file to a control in my Winforms app. The control displays the PDF but I need the user to be  
able to edit the document. Currently, I am opening a PDF viewer and setting a link to the PDF to a string like  
this: string pdfViewer = "PDFCreator.PDFLib.PDFCreator.Presentation.PDFPresentation.PDFPresentation";  
Process process = Process.Start(pdfViewer, pdfLink); The Problem: Process takes a very long time to startup. I  
have an option to kill the process, however that defeats the purpose. The process has an option to 'wait for  
input'. Should I do this?
